Profile: With 2014 sales of EUR 11.7 billion, Bayer MaterialScience is among the world's largest polymer companies. As the world leader in polyurethanes, the company has a unique in-depth know-how in production and synthesis of polyurethanes. With Baycusan®, Bayer Material Science offers a product range liquid-aqueous dispersion and liquid alcoholic solutions based on polyurethanes as well as a polyurea powder-all carefully developed for superior performance. The Baycusan® products are the ideal film formers and sensory additive for groundbreaking sun care, skin care, hair care and color cosmetics formulations. Either in their water-based form or alcohol-based form, they perfectly perform as a film forming polymer with outstanding properties. The polyurea powder as a sensory additive offers unique advantages in cosmetic formulations.
At the end of 2014, Bayer MaterialScience had 30 production sites and employed approximately 14,200 people around the globe. Bayer Material Science is a Bayer Group company.

Profile: CPL Aromas is an international fragrance house, headquartered in the UK, with manufacturing, sales and creative centres throughout the world. CPL Aromas is now operating from seventeen key locations worldwide, serving over 100 countries and ranking around 10th in the sector's global league – despite being one of the youngest companies in the top tier. As we've grown – pushing both technical and geographical boundaries through innovation and expansion into new regions – we have, nonetheless, never lost touch with those founding values: the passion, spirit of independence and commitment to good service that drove those very first ambitious experiments.

Profile: The DEUTSCHE LANOLIN GESELLSCHAFT is entirely specialised in trading with lanolin and its derivatives. We have collected a wealth of experience over the decades about the many benefits and uses of lanolin, which we would like to share with our customers and prospects. We consider ourselves as a long-term and reliable partner and are always committed to the highest level of quality. This is reflected through the ISO 9001 certification that we have since 2003. The DEUTSCHE LANOLIN GESELLSCHAFT was formed in 1968. This was preceded by a collaboration that was established in 1953 between the company Gustav Parmentier and the Westbrook Lanolin Company, Bradford.

Profile: The establishment of the "Industrie-vertretung Manfred Willmann" in 1986 laid the cornerstone for today's MAWI Chemiedistribution OHG. Since 2006, this chemical wholesaler has been led by Robin Willmann and Tanja Fourio, the second generation, and it has been a supplier of specialty chemicals since the very beginning. MAWI works very closely with manufacturing partners from around the world.
Traditionally, these come from European countries; however for the past few years, this distributor has also been building trade ties to Asian manufacturers. In particular, cooperation with supplier partners in China and Korea is of great strategic important for the company's further business development and brand positioning.
MAWI handles advising, sales, and storage functions for all of its suppliers. The focal point of the company's sales activities is on Germany, Austria, and Switzerland; however in recent years supply to Belgium and the Netherlands has become increasingly significant.
