E	Citric Acid	**Citronensäure CAM N1560**	**Nordmann (Jungbunzlauer)**	q.s.

►PemuPur™ START polymer
unique polymeric emulsifier that offers excellent stabilizing properties at low dosage and at the same time has a "quick-break" profile

►SunSHINE™ Pink Champagne C83-4215
shimmering effect pigment (rose gold), ideal for a natural glow effect

►Slimagine
Natural algae extract with slimming effect without yo-yo effect

►NOC
99,06 %

Manufacturing Procedure

1. prepare phase A
2. premix: Combine and mix the ingredients of phase A1
3. add premix to water and stir until homogeneous
4. add phase B and homogenize until homogeneous
5. add the ingredients of phase C one after the other and stir until homogeneous
6. adjust the pH value to 5.00 - 5.50 with phase E
7. finally homogenize briefly and fill

All the information contained herein, as well as the technical advice, has been based on practical experience and thorough examinations. However, it represents non-committal recommendations only. We therefore strongly recommend that users should carry out their own tests before putting our products to their intended use. This applies in particular to our sample formulations, which are merely intended as a starting point for developing own applications and for which we therefore extend no warranty. The sole responsibility for assessing whether conflicting property rights of third parties (e.g. patents) exist in any of the countries concerned lies with the user; in this regard, too, we do not extend any warranty for sample formulations or sub-formulations. The sale of our products is governed by our General Terms & Conditions.
