PACKAGING

SUPPLIERS

Market survey | Which packaging suppliers offer which packaging items? And which services go with their products? Our updated market survey of packaging suppliers with its clearly structured tabular layout lets you see at a glance which suppliers offer which types of products. You can also see what each supplier specialises in.

AVALON LIGHT is a new compact standard series with magnetic refill system designed by Corpack. These compacts can also be made without a magnet for a non-refillable solution.

AVALON LIGHT – SNAP & GO

Corpack's AVALON standard compact line is now available with a magnetic refill system.

The magnetic refillable Avalon light compact series combines elegance, functionality and comfort of use. Refill compacts are an environmentally friendly solution, extending the life of the packaging by re-using the primary package and reducing waste.

Avalon's timeless design, displaying its content in an attractive way, offering an affordable solution for the mass market brands, as well as a more up-scaled version with high-end finishes.

Avalon has an elegant and user-friendly clasp, which allows for an easy and "fingernail-free" opening of the compact.

For an individual look, the large surface gives a lot of freedom to decorate, metallize, silk screen or hot foil print, or apply a multitude of surface treatments.

The line consists of four compacts for a 30-, a 42- and a 59mm pan-size, including a refillable, cream-to-powder compact (deep base, 59mm pan).

Corpack is specialized in the design, development and production of cosmetic packaging. We provide a very comprehensive service, offering "one-stop shopping" for any brand seeking to design and develop a new line or the relaunch of an existing one. Corpack offers custom packaging options as well as a wide variety of standard solutions to the beauty industry.

Neopac has launched three new packaging solutions for sophisticated cosmetics this year

TUBES FOR SOPHISTICATED COSMETICS

Neopac, which has sites in Switzerland and Hungary, has launched three new packaging solutions for sophisticated cosmetics this year:

Stylo™ – new handwriting for care products

The three tube applicators Stylo Pipette, Stylo Liner and Stylo Bristle provide point-to-point, line-perfect, and precise application of cosmetic creams and serums. The applicators are hygienic and easy to clean. Thanks to the on/off rotating bezel with arrow diagrams, the product stays where it belongs – on the skin or in the tube. All parts of the tube can be separately colored, apart from the applicators themselves. The tubes are available in Polyfoil® (for high product protection), PE and COEX materials and can be finished with offset printing, silk-screen printing or hot-foil embossing.

ETMA Tube Award: laminate category

Amplify pump tubes – the value for money one

Care of facial and baby skin is challenging and can happen anytime, anywhere. In order to improve the consumer's experience for teenagers and young adults regarding standard tubes, Neopac's new Amplify pump tube is ideally suited as a starter edition for cosmetic brands or for privately traded labels, who want to upgrade functionality of cosmetic applications in 15-50ml PE or COEX tubes. Thanks to the easy-to-use pump, dosing is precise and pleasant for the user. The Amplify pump tube impresses with few pieces, integrated leakage protection, easy handling, precise dosage and, last but not least, with its attractive price and availability in large quantities.

PICEA™ wood tube – the sustainable one

Good news to all organic and natural cosmetic brands: Our wooden tube is getting better and better! Now we have even more renewable material in the tube body and shoulder. The spruce wood comes from Germany and the tube surface is easy to print. The material is recyclable and food grade according to regulation (EU) No. 10/2011.

Schubert-Cosmetics
Fully automated adjusted to a wide range of format sizes: RSC carton magazine and erecting tool.

PEAK PERFORMANCE

Schubert's latest development: high-performance erector for RSC cartons

Schubert has developed a new high-performance erector for the fully automated erecting, filling and closing of RSC cartons. This new technology is ideally suited for products such as shampoos and body lotions which need to be filled and packaged with high output. The compact TLM machine can handle individual bottles as well as a shrink-wrapped groups of bottles.

Highlights include a fully automated, multilane and self-adjusting cardboard magazine via NC drives and an erecting tool with 12 spreading elements which adapt themselves to different formats. There is no need for exchange or manual adjustment of parts to run a wide range of various carton sizes resulting in a very short change overtime and a high degree of format flexibility. Format conversion can be selected easily and quickly via the Schubert packaging control system VMS.

The carton magazine is able to handle an extensive selection of carton sizes – ranging from 120 x 100 x 100 mm to 900 x 430 x 400 mm – and automatically converts between one-, two-or three-lane versions.

The Schubert-Cosmetics team of experts develops, designs and supplies innovative filling and packaging systems for the cosmetics industry. The focus is on Schubert technology with proven standard components and extremely compact machine solutions that ensure high machine availability. Fast, efficient product and format changes enable cost-conscious filling and packaging for different product sizes and types – even for the smallest batch sizes.

www.seufert.com

Seufert's strength is the manufacture of top-quality customised creative packaging made from transparent, translucent, and dyed materials.
While we are renowned for our transparent folding containers, our range is not limited to see-through packaging. Plastic offers so many more options for display. However if you are looking for transparent packaging of any kind, displays, or signage, you are in the right place. We develop and produce solutions which are tailored to your needs. Discover the world of Seufert!
