

# Ingredients suppliers 2007

Once again we present our market survey of suppliers of ingredients for the cosmetics industry, which has been fully updated for you. The table contains details of all the companies that responded to our questionnaire and returned their replies in good time. This year a total of about 150 ingredients suppliers sent us details of their companies and their product lines.

Of the companies that took part in our survey about one sixth also have fragrance products in their ranges.

Plant-based ingredients are very much in vogue and are offered by about 80 percent of the companies listed. In contrast only about 15 percent have ingredients of animal origin. For those interested in synthesised ingredients about 60 percent of the suppliers have something to offer.

**A**n important aim of this survey was to produce for you a practical and easy-to-read reference work. The table makes it easy to see, at a glance, which suppliers offer which types of ingredients. It also indicates which suppliers specialise in certain types of product.

90 percent of the companies listed stated that they produce ingredients themselves. About one third are distributors that also produce certain items themselves. About two thirds of the companies supply active substances and over 50 percent offer additives and basic ingredients.

If you are an ingredients supplier and would like to be included in our survey in 2008 please contact us now. Email [dorothea.michaelis@health-and-beauty.com](mailto:dorothea.michaelis@health-and-beauty.com).
