SETTING THE STANDARD IN CARRIER SYSTEM TECHNOLOGY!

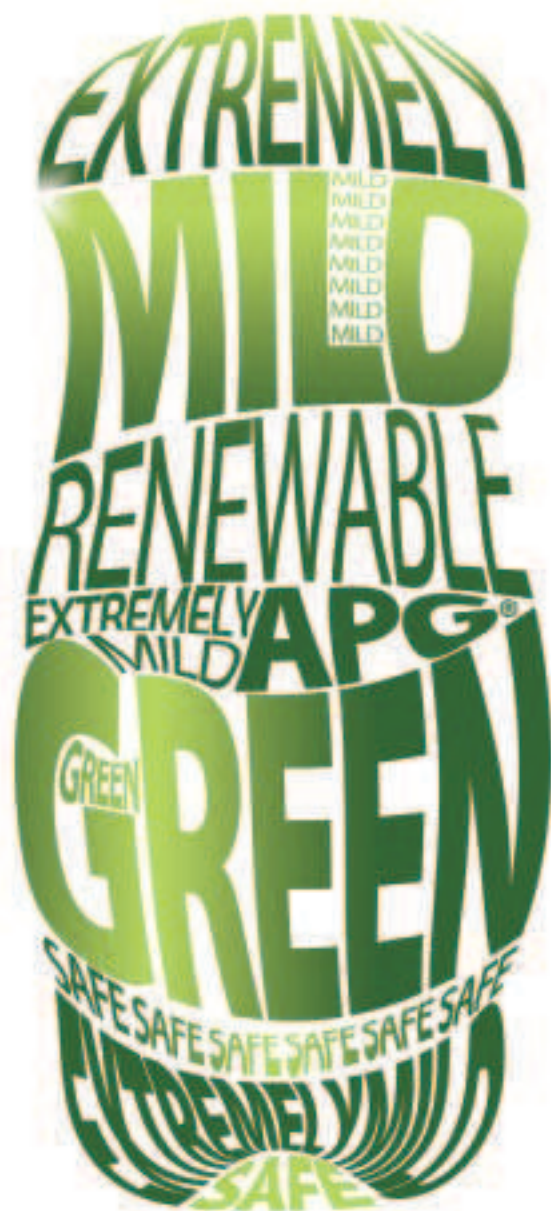

OleoSpheres™ is an innovative cosmetic gadget with the colourful look of beads but a non-slurry composition of mainly natural, plant derived ingredients, i.e. 40% skin nurturing natural oils, vitamin E and soya lecithin, giving them a unique soft texture. Unlike exfoliating beads the OleoSpheres™ break down upon application and release their valuable contents whilst vanishing completely – leaving nothing but the feeling of soft skin. Valorise your formulations with the unique visual and functional effects of OleoSpheres™!

ROVI
COSMETICS

Green from head to toe: Cognis APG®.

A baby's skin is the most delicate and sensitive of all, and therefore needs especially gentle care. But adults too are showing an increasing preference for extra-mild body cleansing. Do your products satisfy these desires? With our green APG®, they can. And there's more: APG® is safe, not only for consumers but also for the environment. APG® is a unique class of non-ionic surfactants, obtained from renewable raw materials. It's free of preservatives, sulfates, and ethylene oxide. APG® is ideal for creating mild body cleansing products, baby care concepts, and shampoos.

Cognis is the world's largest manufacturer of the original APG® surfactant and has the longest history in production and application know-how. APG® will turn your formulation green – without any compromise in performance. The alkyl polyglucosides from Cognis are available under the Plantacare® and Plantaren® brands and can be purchased throughout the world with top-grade quality. And thanks to its natural provenance it has a perfect environmental footprint, too.

Cognis APG®, the original green surfactant.
