The green hair booster Cognis APG®.

Green is not just a color. At least not in the hair care business. In this case it stands for exceptional gentleness and natural ingredients – all those attributes consumers are looking for nowadays in a shampoo. With our sulfate-free, utterly green APG®, such qualities can be readily incorporated into your formulations. Manufactured entirely from plant-based raw materials such as coconut oil and starch, APG® creates a perfect synergy of mildness, foaming performance and effective cleansing. For use in shampoos, body-wash lotions, shower gels, or liquid soaps.

Cognis is the world's largest manufacturer of the original APG® surfactant and has the longest history in production and application know-how. APG® will turn your formulation green – without any compromise in performance. The alkyl polyglucosides from Cognis are available under the Plantacare® and Plantaren® brands and can be purchased throughout the world with top-grade quality. And thanks to its natural provenance it has a perfect environmental footprint, too.

Cognis APG®, the original green surfactant.
