

Development formulation

Cherry & coconut lip glaze

C6053

A lip glaze based on Seatons coconut oil, a light textured solid that melts at body temperature and gives great emollient properties. Seatons castor oil enhances the feel of the glaze while Seatons cherry kernel oil is rich in vitamins A and E and natural antioxidants alpha, delta and gamma tocopherols. Seatons sunflower oil and Seatons sheanut butter complete the natural emollient package.

Product / INCI Name	Functionality	% w/w
Seatons refined coconut oil (Cocos Nucifera Oil) ¹	Natural emollient	To 100
Seatons BP/EP castor oil (Ricinus Officinalis Oil) ¹	Natural emollient	13.50
Seatons high oleic sunflower oil (Helianthus Amygdalus Dulcis Oil) ¹	Natural emollient	13.50
Seatons refined cherry kernel oil (Prunus Avium Seed Oil) ¹	Natural emollient	13.50
Beeswax (Cera Alba) ²	Structuring agent	6.50
Seatons refined sheanut butter (Butyrospermum Parkii Butter) ¹	Natural emollient	6.50
Carnauba wax (Copernicia Cerifera (Carnuba) Wax) ²	Structuring agent	6.00
Tocopherol	Antioxidant	0.5
Flavour, preservative, colour		q.s

Suppliers: - **1: Seatons** 2: British Wax

Method

Combine waxes and oils and heat gently. Stir gently and add any preservative. Fill off into moulds @ 60 - 65°C.

Appearance: opaque soft yellow solid	
pH: N/A	Stability: 1 month @ 4°C, 25°C, 45°C and window sill

Non warranty

This formulation has been subjected to limited stability tests and has been shown to perform well. However formulators adapting this approach should ensure to their own satisfaction long term stability and functionality. It is good practice to conduct safety tests on all final formulations prior to marketing. Suggested uses should not be taken as an inducement to infringe any existing patents.
