the long-lasting moisturizer **DayMoist CLR**

DayMoist CLR improves the hydration level of the upper layers of the skin immediately and for at least 24 hours.

DayMoist CLR is a natural active ingredient potently supporting the natural moisturizing factors (NMFs) in arranging a high level of hydration in the stratum corneum.

DayMoist CLR has an immediate and long-lasting boosting effect. Just one single application of a cosmetic formulation containing DayMoist CLR leads to significant moisturization for at least 24 hours.

The moisturizing properties of **DayMoist CLR** have been proven objectively and reliably by a combination of two *in vivo* technologies: Confocal Raman Microspectroscopy and Corneometry.

DayMoist CLR is designed for all types of leave-on formulations which are intended for everyday care and moisturization of the skin.

Hair care

In our hair care special this month we have gathered a total of 22 formulations from 17 different ingredients suppliers. If they are of particular interest to you they can be downloaded from www.cossmma.com using the access codes shown in the Internet button on this page.

In June we will be turning our attention to natural cosmetics products and in July it will be the turn of products for mature skin. All of the information published here has been carefully assembled, however neither the publishers nor the developers of these formulations can accept responsibility for their safety or accuracy.

For those that like a splash of colour Merck's Hair Mascara is just the thing. Black Shine Hairstick from LCW has been specially created for black hair. The selection of shampoos includes a Clear Conditioning Shampoo from Aqualon, a Shampoo for Normal Hair from Dow Corning, a Conditioning Shampoo for Coarse and Damaged Hair from Evonik Goldschmidt, a Protective Transparent Shampoo from Galaxy Surfactants, and a Clear Conditioning Shampoo from Stepan.

PhytoCellTec™

PhytoCellTec™ Malus Domestica Plant stem cells for skin stem cell protection

PhytoCellTec™ – a novel plant cell culture technology – has been invented to cultivate dedifferentiated cells from a rare Swiss apple. These apple stem cells are rich in epigenetic factors and metabolites, assuring the longevity of skin cells.

- **Is the breakthrough in anti-aging**
- **Delays senescence of essential cells**
- **Protects longevity of skin stem cells**

Stem cells are the most valuable cells in our skin and need to be cared for thoughtfully. PhytoCellTec™ Malus Domestica provides a revolutionary anti-aging performance for real rejuvenation.
