En·er·gy (noun)

[én-er-jee]

1. the strength and vitality required for sustained activity
2. (cellular) generated by mitochondria through the formation of adenosine triphosphate (ATP)
3. the resulting benefit imparted from three Vincience™ actives: ATPeptide™, GP4G, and Signaline™

Vincience™ Actives

ATPeptide™ IS

An energy boosting peptide specifically designed to revitalize aging skin by increasing skin's structural and functional integrity.

Epidermal Barrier – Keratin Expression

Evaluation on ex vivo skin via double immunofluorescence

Control

ATPeptide™ IS Treated

ATPeptide™ IS induces an increase in ATP levels in human fibroblasts.

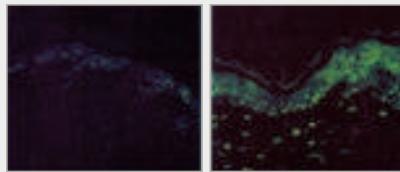

Ex vivo studies have demonstrated that ATPeptide™ IS increases keratin expression, thus reinforcing the epidermal barrier.

GP4G IS

A unique plankton extract that energizes, protects skin from environmental stresses, and enhances skin's maintenance and repair.

Restores HSP70 Expression

Evaluation on ex vivo skin via immunofluorescence

Placebo

GP4G IS Treated

GP4G IS, a stable precursor of ATP, restores the decrease of HSP70 in skin caused by aging or by treatment with retinoids.

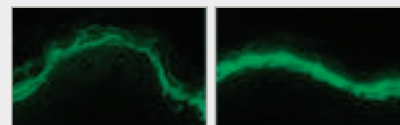

Signaline™ S

A botanical cellular activation signal amplifier that increases cellular energy and promotes epidermal and dermal regeneration.

Protein Regeneration

Filaggrin Expression in Human Skin

Evaluation on ex vivo skin via immunofluorescence

Control

Signaline™ S Treated

Signaline™ S increases intracellular ATP content, thus contributing to improve the efficiency of the signal transfer, which in turn, promotes epidermal and dermal regeneration.

Body care

We have collected a particularly large selection of body care product formulations for you in this issue. A total of 27 companies have submitted 40 different formulations, which, if you require details, you can find at www.cossmag.com, from where they can all be downloaded. This month's access codes are on the Internet button on this page.

In October we will be focussing on products to firm the skin and in November it will be the turn of sprays and mousses. All of the information published here has been carefully assembled, however neither the publishers nor the developers of these formulations can accept responsibility for their safety or accuracy.

The formulations on offer this month include products covering the widest range of body care applications. For instance, what about a treatment for stretch marks, a sun-tan lotion, a clear micro-emulsion after-shave, several deodorants and antiperspirants, shimmering body lotions, or various personal cleansing products?

The exfoliant formulations in this month's selection include **Peach Smoothie Body Scrub** from Dow Corning, **Sugar Scrub** from Sisterna, an **Exfoliating Body Cleansing Cream for Men** from Southern Cross Botanicals and **Detox Scrub-Gel with marine extracts** from Unipex.

MPC™

– Milk Peptide Complex

reduces the visible signs of skin aging and helps the skin to regenerate.

MPC™ – Milk Peptide Complex contains natural bioactive polypeptides (Cytokines) obtained from milk. These cytokines are the key regulators of cell functions. They enable cells to react on changes very fast and efficiently. One example of this is TGF- β (Transforming Growth Factor β) which has been identified in its active form in MPC™.

MPC™ – Milk Peptide Complex is a strong activator of regenerative cell functions. It acts as a booster of collagen synthesis and that of other Extracellular Matrix (ECM) compounds leading to a reorganization of the ECM. *In vivo* tests have shown that MPC™ shortly reduces wrinkle depths and skin roughness. MPC™ also fights cellulite by stimulating production of connective tissue components, thereby increasing firmness and thickness of the skin.
