Sprays and Foams

The focus in our November issue is on formulations for "Sprays and Foams". We have collected 27 suggested formulations from 20 different ingredients suppliers. For those who want full details the formulations can be downloaded free of charge at www.cossmma.com. You will find the necessary access codes for November on the Internet button on this page.

Some of these formulations sound really exciting. How about, just as an example, the **Ice Cool Mousse** from **Croda**? Or what do you think about the **Conditioning Mousse** from **Interpolymer** and the **Volumizing Hair Mousse** from **Lubrizon Noveon Consumer Specialties**? There is also a rather tempting-sounding two phase **Shower Milk Shake** from **Sisterna**.

In December we will be looking at the subject of lotions, creams and exfoliants. January 2009 will see the return of sun-care formulations. All of the information published here has been carefully assembled, however neither the publishers, nor the developers of these formulations, can accept responsibility for their safety or accuracy.

PhytoCellTec™

PhytoCellTec™ Malus Domestica Plant stem cells for skin stem cell protection

PhytoCellTec™ – a novel plant cell culture technology – has been invented to cultivate dedifferentiated cells from a rare Swiss apple. These apple stem cells are rich in epigenetic factors and metabolites, assuring the longevity of skin cells.

- **Is the breakthrough in anti-aging**
- **Delays senescence of essential cells**
- **Protects longevity of skin stem cells**

Stem cells are the most valuable cells in our skin and need to be cared for thoughtfully. PhytoCellTec™ Malus Domestica provides a revolutionary anti-aging performance for real rejuvenation.
