

# Packaging

**Download Extra**

The exclusive service for our subscribers:

At [www.cossmma.com/process](http://www.cossmma.com/process) you will find additional information that you can download.

Your access codes for November:  
 User name: **cossmall**  
 Password: **new**

To help you find the right packaging supplier, and to develop truly attractive packaging for your products, all of the main packaging suppliers and service providers are listed in this fully updated market survey.

If the packaging is unattractive the consumer will normally pick up the product only if she is obliged to buy that specific brand. But, in view of the huge selection available on the shelves today, such a situation is more the exception than the rule. Anyone wanting to make his product stand out at the point of sale has to be creative, and that means finding an imaginative packaging supplier or turning to a full-service partner with innovative ideas on offer.

In this tabular overview you will find a total of 164 suppliers from all the relevant aspects of the packaging business (37 percent more than last year). You can see at a glance who, for instance, supplies caps, bottles, jars, tubes, retail cartons or whatever. But also those in search of packaging for a specific product type, such as colour cosmetics, can quickly see which are the relevant suppliers. The market survey has also been posted on the Internet.

**Web exclusive: market survey of process technologies.**

And, talking about the Internet, you will find there an additional market survey that you can download from our web site.

Just go to [www.cossmma.com/process](http://www.cossmma.com/process).

In this additional survey, which is found only on our web site, we have listed 55 suppliers and their specialised process technologies in categories.

And by the way, if you think that your company should have been listed in our survey just send an e-mail to [dorothea.michaelis@health-and-beauty.com](mailto:dorothea.michaelis@health-and-beauty.com). This will make sure that you are included in our next update. Inclusion in the survey is of course free of charge.

Rainer Feuchter  
Managing Director  
Kugler GmbH

### ■ What is the basic philosophy behind your company?

At Kugler we see ourselves as being in partnership with our clients. Being close to the market is also a particular aspect of our business. We achieve both of these objectives by having a very flexible company structure. As part of the Optima Group Consumer, a family-owned and operated group of companies, we offer stability, a global presence and comprehensive customer service.

### ■ What innovations has your company introduced in 2009?

In the RFID MODULINE we have launched a machine system that includes two revolutionary new features. With this equipment it is now possible to process the very smallest batch sizes which means in effect there are no longer, from a packaging point of view, any restrictions on product differentiation and personalisation. This clever piece of equipment works with the help of RFID tech-

### Points highlighted by Kugler:

- Previously unheard-of machine versatility (RFID MODULINE)
- First class quality
- Leader in technology
- World-wide service with 24 hour hotline
- Extensive training options
- Customer induction programme
- A family-owned and operated group of companies (Optima Group)

nology: An RFID chip attached to the transport puck transmits the format details to the line equipment at each station.

The second innovation is in the modular design of this equipment. Cosmetics products not only call for rapid format changes but also there is often a need for equipment that is to be used on short notice for product-specific processes or to increase the production capacity. Until recently the only solution was new machinery, which is the reason why we developed a system of basic modules which can be expanded by adding different functions. The basic modules can be connected using the "plug and play" concept. By utilising this concept additional capacity, and different functions, are easy to integrate. It is not only cheaper but also a lot quicker.

### ■ What are the advantages offered by your products/services?

Kugler is well known for very high quality machines, which guarantees security to the client investing in new equipment. Permanent high outputs, precise processing, a high level of machine availability and high pack quality.

### ■ What specific solutions do you offer for cosmetics manufacturers?

Kugler is a partner supplying filling and packaging lines that are often installed as part of a turn-key project. We develop high performance, project specific, complete lines to meet a customer's particular requirements. Monobloc equipment or highly versatile MODULINES from our new modular system.
