

At a glance

Service providers

In times when money is not so free the market needs products that have something totally new to offer. But to keep development costs within reasonable limits it's a good idea from time to time to check out what service providers can do for you. This is where our fully updated market survey can help. It contains, at a glance, details of 125 service providers.

Most of the service providers listed in our clearly-presented table are contract manufacturers of one kind or another, including contract developers that can take the whole burden of product development off your shoulders, but also specialist contract manufacturers, contract fillers and contract packers. In this category our survey gives you details of a total of 64 different suppliers. Should you be interested in sub-contract laboratory services

you will find 21 different laboratories listed with details of the services they offer. In addition to 5 software suppliers we also list 20 companies who specialise in training, as well as a number of exhibition specialists. There are 21 consultancy firms, 19 agents and 28 companies offering other specialised services.

Are you a service provider not listed in this survey? Well, you can make sure right now that you are included in the 2010 survey by visiting www.cossma.com/marketsurvey/uebersicht. Just download the entry form, fill it in and send it back to us.
