Elements of Care.

Be inspired by our unique formulation concept based on global market insights and consumer demands:

- Providing high performance formulations with innovative ingredients
- Minimizing the impacts of air pollution, UV rays, dust and dry air
- Protecting your skin and hair from negative side-effects such as loss of radiance and dry skin

People around the world desire individual solutions, we create them with passion — that's what we call: The Soul & Science of Beauty.

COSSMA DOWNLOAD-TIP IN APRIL

Poly-sensoriality is about using all five senses in the product experience. Helga Hertsig-Lavocah presents some inspiring concepts. Consumers are overstimulated and overwhelmed in view of the growing product offering. Brands thus have to do even more to stand out and engage them. There has been a focus on scent and aromachology, correctly, but here in the West we have done less with touch, textures and sounds. COSSMA Subscribers can download further background information.

An innovative concept for real-time and accelerated emulsion and suspension stability testing

Date: Tuesday, June 21st,
11 A.M. (Berlin Time)

Duration: 30-45 minutes, Language: English

Speaker: Dr. Arnold Uhl, LUM

To register, go to www.cossma.com/webinar

Speaker: Dr. Arnold Uhl,
LUM GmbH

About the webinar

The webinar is targeted at formulators and product developers, product and quality control managers in cosmetics, home and personal care industries. R&D people in cosmetic and related industries are under pressure to develop, test and market new formulations in periods, much shorter than the product shelf life itself.

Accelerated stability testing is a must to allow short development cycles and be competitive.

The innovative STEP-technology is explained, allowing the Space and Time resolved measurement of Extinction Profiles simultaneously for the entire height of a sample from top to bottom. This platform technology allows for the characterization of undilute samples in low or high concentration, of low or high viscosity, in real-time or directly physically accelerated. Physical separation stability and acceleration opportunities of the separation according to ISO/TR 13097 are discussed. The concept of comparative shelf life prediction (ISO/TR 13097) and its easy application is shown for selected examples. Q&A terminate the session.

About the speaker

Arnold Uhl studied chemistry at Humboldt-University in Berlin from 1989-1994, being particularly interested in organic photochemistry. He received his PhD in chemistry from Humboldt-University in 2001. From 1999-2004 he worked in a company producing instruments for scientific research. In 2004 Dr. Arnold Uhl joined the marketing and sales department of LUM GmbH and was appointed Sales & Marketing Manager in 2009. In December 2015 he was appointed member of the board of directors of LUM (Changzhou) Instruments Co., Ltd. □

Als stark expandierendes Unternehmen gehören wir seit über 50 Jahren zu den führenden Kosmetikherstellern. Wir vertreiben unsere hochwertigen Pflegeprodukte in Kosmetikinstituten und exklusiven Spas. Neben unserer Biomimetic SkinCare bieten wir auch eine umfassende nach COSMOS ORGANIC zertifizierte Biolinie an.

Zum nächstmöglichen Zeitpunkt suchen wir für unsere Abteilung Forschung & Entwicklung einen

Mitarbeiter (m/w) für die Entwicklung kosmetischer Produkte.

Ihre Aufgaben:

Eigenständiges Durchführen von Entwicklungsprojekten von der Idee bis zur Chargenfertigung mit sämtlichen dazugehörigen Teilaufgaben wie:

- Bestehende Rezepturen weiterentwickeln und optimieren
- Rezepturen für Neuentwicklungen nach diversen Vorgaben erstellen
- Herstellung von Entwicklungsmustern im Labormaßstab
- „Scale up“ der Rezepturen vom Labor- in den Produktionsmaßstab
- Selbständige Koordination und aktives Vorantreiben der Entwicklungsprojekte unter Einhaltung der zeitlichen Vorgaben
- Gewissenhafte Dokumentation der Versuchsergebnisse
- Eigenständige Verwaltung der Rückstellmuster und Rezepturen
- Recherche hinsichtlich neuer Rohstoffe und Rahmenrezepturen und Korrespondenz mit Rohstofflieferanten

Ihr Profil:

Wir erwarten eine fundierte Ausbildung in Form eines abgeschlossenen naturwissenschaftlichen Studiums mit entsprechender Spezialisierung oder Studium der Kosmetikwissenschaft bzw. eine vergleichbare Qualifikation.

Außerdem zeichnen Sie sich durch hohe Teamfähigkeit und Kommunikationsbereitschaft sowie eine gut strukturierte, zielstrebige und kreative Arbeitsweise aus. Mehrere Jahre Berufserfahrung im kosmetischen Labor setzen wir für diese anspruchsvolle Aufgabe voraus.

Wir bieten:

Sie erwartet eine abwechslungsreiche Position im Angestelltenverhältnis mit kurzen Entscheidungswegen in einem modernen, inhabergeführten Unternehmen, eine intensive Einarbeitung, ein attraktives Einkommen, sowie entsprechende Sozialleistungen in einer der schönsten Regionen Deutschlands – dem Chiemgau. Bitte senden Sie Ihre vollständigen Bewerbungsunterlagen gerne auch per E-Mail mit Angabe des frühestmöglichen Eintrittstermins und Ihrer Gehaltsvorstellung an:

Dr. Spiller
Pure SkinCare Solutions

pollushield™

functional ingredient

Ward off pollutants
from the skin

CFDA listed

REDUCTION OF LIPID PEROXIDATION

POLLUSHIELD™ functional ingredient can help skin resist the harm caused by environmental pollution as it provides a barrier between ambient pollutants and the skin and reinforces its antioxidative defence capacity. When treated with 5% **POLLUSHIELD™ functional ingredient**, the skin exposed to urban pollution in China (Beijing) demonstrated almost no accumulation of metals as well as a greater antioxidative power and decreased lipid peroxides. A complete skin protection from urban pollution.
