Method

Weigh Part A and melt to around 75 °C. Mix well.
Weigh Part B; add it to Part A at around 65 °C. Mix well.
Weigh Part C; add it to Part A+B. Mix well
Pour the hot mixture into jars or tubes.
Allow cooling before putting caps.

Non-warranty

This formulation has been subject to limited stability tests and has been shown to perform well. However formulators adopting this approach should ensure to their own satisfaction long term stability and functionality. It is good practice to conduct safety tests on all final formulations prior to marketing. Suggested uses should not be taken as an inducement to infringe any existing patents.
