RonaCare® Ectoin	1.30200 (8)	ECTOIN	0.30
Methyl-4-hydroxybenzoate	1.06757 (8)	METHYLPARABEN	0.15
C			
Rhodicare S	(11)	XANTHAN GUM	0.25
D			
Fragrance 46235 Grenadine	(12)	PARFUM	0.20

Procedure:

Formulation Example

Rahmenrezeptur

Heat phase A and B separately to 75°C. Add phase C slowly to phase B while stirring until a homogeneous mixture is obtained. At 75°C add phase A to phase B/C and homogenize for 1 min. (Ultra Turrax T25 at 8000 rpm). Cool down to 35°C and add perfume. Cool down to room temperature while stirring. The pH value should be between 5.0 - 5.5.

Notes:

Taking care of hands and nails is important, especially in winter. This sophisticated treatment certainly does its job well. RonaFlair™ Balance Red and Blue put a violet interference effect to the skin. This helps correcting skin imperfections in an instant, leaving the skin looking fresh and radiant. RonaFlair™ White Sapphire is providing the white color and brilliance. The caring effect of this hand & nail treatment comes from the use of Rona Care® Biotin Plus (Vitamin H, anti-aging) and RonaCare® AP (anti-aging), as well as from RonaCare® Ectoin (cell protection, anti-aging). Care, protection and skin correction - all in one product!
