Samba Bum - Cream

NOI: 95.1%

deep moisture, gentle exfoliation

No more compromises. With the help of Evicare® hyaluron M, Evicare® hyaluron S and Evicare® wintergreen you have both - deepest moisture and the gentlest exfoliation. Our ultra-light, fast-absorbing body cream delivers hydration without the sticky feel while taking care of cell turnover.

Phase	Tradename	INCI Name	COSMOS	%
A	Water	Aqua	Yes	57.2
A	Evicide® Propanediol	Propanediol	Yes	5.0
A	Evicide® Butylene Glycol eco	Butylene Glycol	Yes	4.0
A	Evicide® hydrosens	Hydroxyacetophenone	No	0.7
A	Evicare® aquatex 14	Xanthan Gum	Yes	0.3
A	Evicare® hyaluron M	Sodium Hyaluronate	Yes	0.1
A	Evicare® hyaluron S	Sodium Hyaluronate	Yes	0.1
B	Jojoba Oil[(1)]	Simmondsia Chinensis Seed Oil	Yes	10.0
B	Shea Butter[(1)]	Butyrospermum Parkii (Shea) Butter	Yes	10.0
B	Evicare® emulgiza rich	Glyceryl Stearate Citrate, Cetearyl Alcohol, Glyceryl Behenate	Yes	5.0
B	Evicare® Dibutyl Adipate	Dibutyl Adipate	No	4.0
B	Evicare® lipotex plus	Hydrogenated Vegetable Oil	Yes	2.0
B	Evicare® glossfix plus	Dimer Dilinoleyl Dimer Dilinoleate	No	1.0
B	Evicare® wintergreen	Salicylic Acid	Yes	0.2
B	Evicare® toco mix	Tocopherol, Helianthus Annuus Seed Oil	Yes	0.2
C	Parfum Green Tea Jasmin[(2)]	-	No	0.2
D	Sodium Hydroxide (20%)	Aqua, Sodium Hydroxide	Yes	q.s.

* Supplier: [(1)]Gustav Hess, [(2)]Lothar Streeck

Manufacturing procedure:

Mix components of phase A while stirring and homogenize briefly to ensure a good distribution of the Xanthan Gum. Heat the mixture to 70°C. Mix all components of phase B while stirring and heat to 70°C to melt the solid components and stir until a clear, homogenous solution is obtained.

Phase B is added slowly into phase A while homogenizing with Ultra Thurrax at 12.000 rpm for 2 minutes. The resulting cream is cooled to room temperature while slowly stirring with a mechanical stirrer. Add phase C slowly to the mixture. Adjust the pH value gradually to 4.6 with phase D.
