With 2013 sales of EUR 11.2 billion, Bayer MaterialScience is among the world's largest polymer companies. As the world leader in polyurethanes, the company has a unique in-depth know-how in production and synthesis. With Baycusan®, Bayer MaterialScience offers a product range of polyurethane dispersions and polyurea powder for a

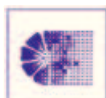

large number of cosmetic applications. In their waterbased form they perform perfect as a film forming polymer with outstanding properties. The polyurea powder as a sensory additive offers unique advantages in cosmetic formulations. Bayer MaterialScience has 30 production sites and employs approximately 14,300 people around the globe. Bayer MaterialScience is a Bayer Group company.

Brenntag GmbH

FLAVEX is specialised in CO₂-extraction, a modern technology for production of lipophilic plant extracts. Supercritical CO₂-extraction is very gentle and leaves no solvent residues. The method separates from plant materials bioactive substances such as antioxidants, natural flavours, essential oils and special fatty oils. CO₂-extracts are used as cosmetics ingredients, in perfumes, food and food supplements and in aromatherapy. CO₂-extracts are sterile and need no preservation.
